

10" extension handle to give the user extra leverage on taller loads.

Three strong "grab points" to make handling the stair climber easier.

3/4" drive screw will not bow - even with loads of up to 1500 pounds

Detachable battery pack makes swapping batteries simple.

Lectro-Truck nameplate means you get 35 years of product experience.

Two adjustable strap bars allow user to adjust specifically to each load.

Leverage bar enables the user to be able to move the heaviest of loads.

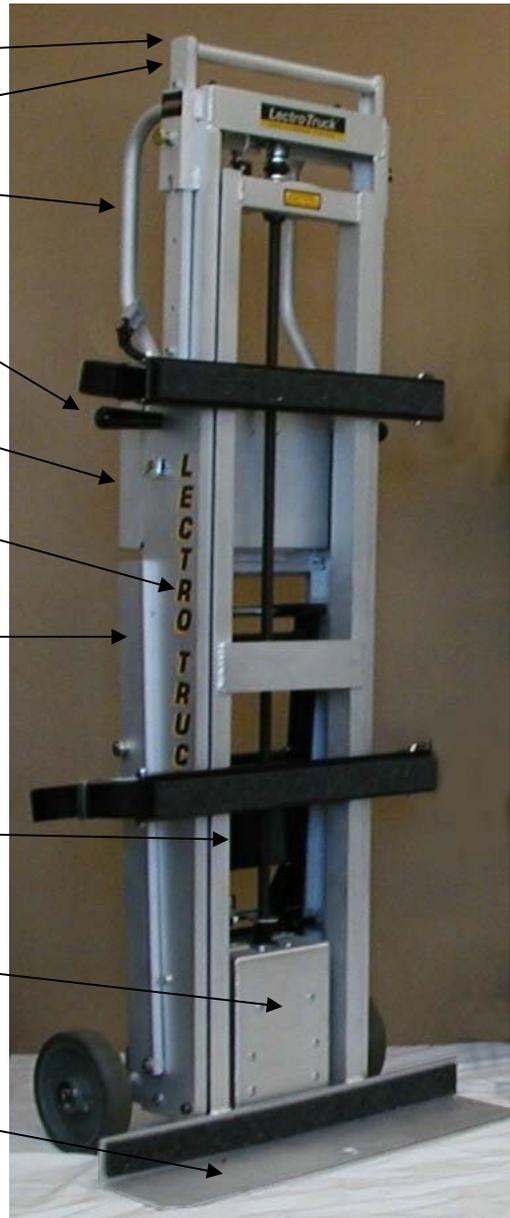

Electric Brake stops the drive screw no matter how heavy the load.

Built-in steel tripod makes moving products down hallways easy.

1-½ Hp motor provides the lifting power you need to move up to 1500#.

Toe plate available in either 24" or 30" widths to fit each individual company's needs.

Heavy duty aluminum construction makes the unit lighter, yet durable.
